

Correction Update

= =

04 NOV 09 WED

I have just found out that on page 6, the phonetic fonts were messed up when they were converted to PDF. I will make corrections when I have time.

= =

12 JAN 10 TUE

I have just corrected Page 6. The shape of the font is different from that on other pages, because on other pages, I used CharisSIL and on Page 6, I used Lucida Sans Unicode. If you downloaded the 3le and saved it on your computer earlier, please replace it with the present, corrected file.

= =

01 JUL 10 THU

I have just changed the font on Page 6 from Lucida Sans Unicode back to CharisSIL. All the phonetic symbols in the paper are now in CharisSIL. I have also made some minor changes on other pages.

44 pages.

= =

06 AUG 10 FRI

Today I changed the table format, which resulted in a reduction of the pages from 44 to 40, a saving of 4 pages. No textual changes were made.

40 pages.
